solving partial differential equations by self-generated ... - solving partial differential equations by self-generated stochasticity. michail zak jet propulsion laboratory california institute of technology advance computing algorithms and ivhm group, pasadena, ca 91109 abstract. new physical principle for simulations of pde has been introduced. it is based upon replacing the pde to be solved by the system of ode for which the pde represents the ... **demographic stochasticity and resource autocorrelation ...** - to include demographic stochasticity in models of spread in order to properly understand biological invasions in spatially heterogeneous environments. our investigation is organized as follows. we first show theoretically, in two models of invasion at different levels of biological detail, that the speed of species spread decreases when the resource autocorrelation length increases. second ... **fully nonlinear first- and second-order stochastic partial ...** - fully nonlinear first- and second-order stochastic partial differential equations 3 discussed here. i also remark that to keep the presentation simpler in many places the discussion **some solutions of fractional order partial differential ...** - method to obtain approximate solutions of nonlinear fractional order partial differential equations with fractional derivatives. the fractional derivatives are taken in the sense of caputo. the solutions of fractional pdes are calculated in the form of convergent series. approximate solutions obtained through the decomposition method have been numerically evaluated, and presented in the form ... **math 463f/605f stochastic differential equations and how ...** - stochasticity, or randomness, is an important part of natural phenomena. in initial modelling work, we in initial modelling work, we generally focus on average behaviour (ordinary or partial differential equations), and assume that long **stochasticity, periodicity and coherent structures in ...** - in order to trigger mode locking in these lasers, polarisation controllers are used that allow conversion of input light of arbitrary polarisation to output light of any desired polarization. **a study on travel time stochasticity in service network ...** - in order to obtain results with the lowest bias possible, we focused on optimal solutions only, for both the deterministic and the stochastic formulations. for this reason, **the critical domain size of stochastic population models** - the critical domain size of stochastic population models ... (individuals disperse and then reproduce) in order to be able to determine the effects of stochasticity on the extinction dynamics without conflating the results with those 123. the critical domain size of stochastic population models 757 caused by more complicated population structures. we assume the simplest case of ... **reduced basis methods for parameterized partial ...** - reduced basis methods for parameterized partial differential equations with stochastic influences using the karhunen-loeve expansion bernard haasdonk, karsten urban, and bernhard wieland **the dawning of the age of stochasticity - applied mathematics** - the dawning of the age of stochasticity 199 2. the taxonomy of mathematics i want to begin by setting probability and statistics in their places as a part **can the stochasticity of field lines be responsible for ...** - the aim of this work is to contribute to understanding whether the partial reconnection of magnetic field lines during crashes of sawtooth oscillations in tokamaks could result from the stochasticity of the magnetic field lines. **references - university of waterloo** - references abeyesinghe, a., devetak, i., hayden, p., and winter, a. 2009. the mother of all protocols: restructuring quantum information's family tree. **deterministic and stochastic nonlinear partial differential ...** - deterministic and stochastic nonlinear partial differential equations with mixed features (e.g. partial hyperbolicity and anisotropy) have played an important role in describing the models in physics, chemistry, nance and other real-world phenomena. **convergence to homogenized or stochastic partial differential ...** - convergence to homogenized or stochastic partial differential equations november 24, 2010 abstract we consider the behavior of solutions to parabolic equations with large, highly **1 the definition of a stochastic process** - 1 the definition of a stochastic process suppose that $(\Omega, \mathcal{F}, \mathbb{P})$ is a probability space, and that $x : \Omega \rightarrow \mathbb{R}$ is a random variable. recall that this means that Ω is a space, \mathcal{F} is a σ -algebra of subsets of Ω , \mathbb{P} is a countably
